Fiscal Analysis

The proposed committee substitute 2 in its current form will increase the number of higher education institutions that receive Section Thirteen distributions. As written, the one-third (1/3) of Section Thirteen proceeds which are currently distributed among the regional universities (e.g. University of Central Oklahoma, Northeastern State University, Northwestern Oklahoma State University, et al.), will now also include distributions to all state junior colleges.

Because the measure does not increase or decrease the overall amount being distributed among the institutions, only the number of recipients, the measure is budget neutral.
