Research Analysis

HB 1456 requires every child under the age of 14 to be secured by a seatbelt or child passenger restraint system when in a motor vehicle.

Fiscal Analysis

HB 1456, which increases the age for children to be secured by a seatbelt or restraint system from 8 to 14 years, could increase the number of individuals violating the statute and required to pay a fine. The actual revenue increase is dependent upon how many individuals are required to pay the fine.
