Bill Analysis

SB 1768 authorizes health districts established by county boards of health to be comprised of multiple county health departments operating under agreement to share resources. The measure also authorizes county boards of commissioners to contract with other boards of commissioners to provide health services. Current law restricts these contracts to county boards of health of neighboring counties and the State Board of Health. Counties are authorized by the measure to establish a central operating hub county. The millage provided by each county within the consortium shall be expended or reserved for the county of origin.
