

Bill Summary
1st Session of the 57th Legislature

Bill No.:	SB 747
Version:	INT
Request No.:	550
Author:	Sen. McCortney
Date:	01/29/2019

Bill Analysis

SB 747 increases the qualifying amounts needed to claim the Investment/New Jobs Tax Credit. Investments into property will require at least \$150,000.00, an increase from the \$50,000.00 currently required by law. Claims based on an increase of full-time employees require claimed, new employees to earn at least \$33,500.00. Current law requires claimed employees to earn at least \$7,000.00.

FOR THE COMMISSION

The estimated revenue impact provided herein is an estimate of the potential impact on the collection or apportionment of tax revenues affected by the proposed legislation. It is not intended to be an estimate of the overall fiscal impact on the state budget if the proposed legislation is enacted.

ATTACHMENT TO REVENUE IMPACT - SB 747 [Introduced] Prepared: February 14, 2019

SB 747 proposes to amend 68 O.S. § 2357.4 which relates to the *Investment / New Jobs Income Tax Credit*. This measure proposes to modify the minimum investment amounts and the minimum salary or wage requirement to claim the credit effective for tax year 2019 and subsequent tax years. This measure also reduces the number of years unused credits may be carried forward.

Current Law:

Under current law, manufacturers, entities engaged in aircraft maintenance and web search portal firms are eligible for a non-refundable income tax credit for either an investment in depreciable property or for the addition of full-time equivalent employees¹. In order to qualify for the investment component the minimum annual investment must be \$50,000.00 in qualified depreciable property. In order to qualify for the job component (net increase in employment), the annual salary or wages of full-time equivalent employees must be in excess of \$7,000.00.

Generally the credit is one percent of the amount of investment in depreciable property or \$500.00 per new job². The credit is allowed for the tax year the investment is made or when the increase in jobs occurs and is also allowed in each of the four (4) subsequent years if the level of new employees is maintained or the qualified property is not sold, disposed of or transferred. Any credit allowed but not used may be carried over in order to each of the four (4) years following the year of qualification and to the extent not used in those years in order to each of the fifteen (15) years following the initial five-year period. To the extent not used, any credit from qualified depreciable property placed in service on or after January 1, 2000, may be utilized in subsequent tax years after the initial twenty-year period. Effective for tax years 2016 through 2018, there is a statewide cap of \$25 million dollars on this credit.

Proposed Law:

This measure would modify the minimum investment amounts and the minimum wage or salary requirement to claim the credit effective for tax year 2019 and subsequent tax years. The proposed minimum annual investment amount is \$150,000.00. The proposed annual salary or wages of full-time equivalent employees must be in excess of \$33,500.00.

This measure also limits the unused credit carryover provisions. If the credit is based on an investment in depreciable property, the credit may be carried over to each of the five (5) years following the year of qualification. If the credit is based on a net increase in employment, the credit may be carried over to each of the ten (10) years following the year of qualification.

Revenue Impact:

The proposed changes are effective beginning with tax year 2019 and would have no impact on Oklahoma income tax collections in the short term.³ A review of tax year 2016 data indicates that approximately \$698 million in *Investment / New Jobs Income Tax Credit* were claimed; comprising of \$627 million in credits that were carried over from prior years and \$71 million in credits that were generated in tax year 2016. The total amount used to offset tax for 2016 was \$25.6 million – less than 4% of the unused carryover portion of the credit.

¹ Web Search Portal firms are only eligible for the investment component of this credit.

² Credits double (2% of the amount of investment in depreciable property or \$1000.00 per new job) if the entity is located in an enterprise zone or if the initial investment is in excess of \$40 million.

³ The credits earned prior to tax year 2019 and not used are not affected by this measure.
