

Bill Summary
1st Session of the 58th Legislature

Bill No.:	SB 1027
Version:	INT
Request No.:	1440
Author:	Sen. Pugh
Date:	01/30/2021

Bill Analysis

SB 1027 requires every health benefit plan providing coverage for a low-dose mammography screening to cover a four-dimensional breast magnetic resonance imaging (MRI) in lieu of a low-dose mammography screening if the previous screening indicated dense breast tissue. The measure also exempts coverage of screenings from pre-authorization from the insurer.
