Fiscal Analysis

This measure makes the issuance of court order to pay a certain fee permissive rather than statutorily required; additionally, it does increase the fee cap from \$100.00 to \$1,000.00 for when a court decides to require payment of the fee. Allowing the courts to exercise discretion in this way has the potential to modify the amount of revenues collected pursuant to the measure, however there is no expected impact to state budget or appropriations as a result of SB77.
