Fiscal Analysis

This measure allows the Corporation Commission to measure methane from an orphaned oil, gas, brine or injection well and obtain any carbon credits that may be available for the measured emissions, with any proceeds from the sale of the credits being used to offset the costs of the programs. According to the Corporation Commission, the implementation of these similar programs will create a minimal fiscal impact for the agency based on what it cannot offset from the revenues. Therefore, there may be a minimal fiscal impact to the state budget for operations of the programs.

The floor amendment does not change the fiscal impact of this measure.
