Bill Analysis

SB 1065 specifies that an ignition interlock device shall be installed on the vehicle most frequently driven by the defendant and that the defendant shall not drive a vehicle not equipped with such a device. The court may not require the installation of the ignition interlock device if the court finds that to require the ignition interlock device would not be in the best interest of justice. If the court is required to have the ignition interlock device installed, the court shall require that the defendant have the device installed before the 13th day after the date the defendant is released on bond. The court is authorized to designate an agency to verify the use and installation of the device at the defendant's expense.
