**Bill Analysis**

SB 506 directs the Oklahoma Department of Agriculture, Food, and Forestry to review methods of remote viewing or other digital inspection technology for meat and poultry product inspections. The measure provides that if the Department determines a suitable method of remote viewing or other digital inspection technology, then the Department shall apply to the federal agency for use of the technology. The use of remote viewing or other digital inspection technology shall be restricted to inspections of meat and poultry products sold only in intrastate commerce, unless the federal agency governing meat and poultry inspection approves it for interstate commerce.
