

Bill Summary
1st Session of the 59th Legislature

Bill No.:	SB 720
Version:	INT
Request No.:	930
Author:	Sen. Burns
Date:	01/24/2023

Bill Analysis

SB 720 provides that a firearm suppressor and the basic materials from which a firearm suppressor is manufactured shall not be subject to federal law or federal regulations as they relate to the authority of the United States Congress to regulate interstate commerce. A suppressor manufactured in Oklahoma must have the words "Made in Oklahoma" clearly stamped or engraved on it. Such suppressors shall be considered manufactured in the State if no materials other than generic or insignificant parts were imported from outside of the State. Generic and insignificant parts are items that have a manufacturing or consumer product application other than inclusion in a firearm suppressor. Additionally, the measure prohibits any officer of the state or political subdivision from enforcing federal regulations relating to firearm suppressors.
