

Senate Fiscal Summary

1st Session of the 60th Legislature

Senate Bill 915

Version:	CS
Agency:	Oklahoma Corporation Commission; Commissioners of the Land Office
Senate Author:	Green
House Author:	Boles
FY'26 Impact:	\$550,000
Full Year Impact:	\$500,000

Bill Summary and Fiscal Analysis:

SB 915 provides requirements for any commercial solar energy facility constructed on land owned and leased by the Commissioners of the Land Office (CLO) and requires CLO to make a payment to the county treasurer in lieu of ad valorem taxes with respect to real property in any county that has a commercial solar facility installed. The Corporation Commission is directed with enforcing the provisions of the proposal and promulgating rules.

The Corporation Commission estimates a minimal fiscal impact of \$500,000 but could potentially be as high as \$2,000,000 depending on the number of commercial solar energy facility cases the Public Utilities Division (PUD) may receive. The Commission estimates the recurring annual costs to include 1 analyst FTE, additional legal and administrative law judge hours, administrative hours, and the cost of an outside consultant. One-time costs are estimated at \$50,000 for rulemaking.

A fiscal impact is pending from CLO.

Fiscal impact provided by Corporation Commission and Senate staff.
