Fiscal Analysis

The amendment to the proposed committee substitute to HB 2751 has no impact on the current fiscal analysis of the measure.

The proposed committee substitute to HB 2751 introduces language related to setback requirements for wind energy structures. This measure requires the Oklahoma Corporation Commission to maintain a public database of setback provisions by county. The Corporation Commission anticipates a significant fiscal impact in order to create and maintain such a database, and would potentially requires additional appropriations to cover these costs; however, exact cost estimates are unknown at this time.
